

MANAGE YOUR WORKFORCE WITH COMMUNICATOR-CLOUD

Communicator-Cloud is an integrated workforce platform that unifies attendance, mobile apps, analytics, devices, payroll, patrols, and project costings into one system, helping organisations track time accurately, stay compliant, prevent errors, and turn everyday workforce activity into clear, actionable, better insight.

ATTENDANCE TIME TRACKING

Attendance Module

Communicator-Cloud is a modern solution that provides a robust framework for managing workforce time. By integrating biometric, mobile and terminal data into a single platform, it ensures compliance, reduces payroll leakage and delivers insights for accurate forecasting, budgeting and workforce planning.

PLANNER

Simplifies rosters, leave, and workforce availability overview.

SHIFTS

Easily assigned to departments, groups, and individuals, ensuring efficient workforce management.

LEAVE MANAGEMENT

With overviews, quick approvals and automatic notifications to staff.

OVER TIME

Customizable regular and holiday rates, triggers, minimums, and roundings

CLOCK-INS

Night shifts & multiple breaks calculated automatically

***"NO MORE
SCATTERED
PAPER, AND
SPREADSHEETS"***

MOBILE APP REMOTE WORK

Communicator Pro

A game changer, Communicator Pro is the mobile app that extends Communicator-Cloud beyond the office. Employees can clock in, view schedules, and submit leave or overtime requests wherever they are. Managers gain real time visibility of attendance status, helping them respond to absences and issues.

GEO-FENCING

Employees clock in and out from their phone, with GPS to confirm they are at the correct site.

NOTIFICATIONS

Staff can view their weekly schedules and receive instant notifications.

REQUESTS

Employees can submit leave requests and missed punch corrections.

WHO'S IN

Managers can see a live "who's in" overview, approve or reject requests.

SYNCHRONIZATION

All data syncs automatically with Communicator-Cloud instantaneously feeding accurate hours.

***"WHERE IS
EVERYBODY?"***

SCHEDULER ROSTER

Planner

We understand the challenges of running a business that relies on casual workers to complement the core team, while still keeping labour costs within budget. Businesses need to plan ahead to ensure that the right teams, with the right expertise, are assigned to the right sites at the right time. The Planner gives you control, visibility, and a complete overview of your workforce planning.

ROSTER

Create rosters, define working hours, assign colours, simply drag and drop.

BULK SCHEDULE

Repeat roster daily, weekly, or on specific days of the week for multiple employees.

AVAILABLE ROSTER

Your casual workers can view and choose available rosters on the mobile app.

MULTIPLE VIEWS

Filtered view of departments, rosters, leaves, clock-ins, notes, and much more.

TOTAL HOURS

Stick to your budget; keep an eye on the hours assigned to individual employees.

***"PREPARE A PLAN
OR PLAN TO FAIL"***

INFORMATION DATA ANALYSIS

Insights, workflow, and communication

Information and data analysis in Communicator-Cloud transforms raw punches into insights. Visual dashboards, filters, and exportable reports help you track attendance patterns, overtime usage, and compliance, enabling informed decisions that improve overall productivity and workforce transparency.

EMPLOYEE PORTAL

Empowers your workforce to view their assigned shifts, track recent clock-ins, and request leave with ease.

AI

Benefit from AI functionality that assists users and intelligently flags anomalies.

APPROVALS

Direct attendance requests to supervisors, ensuring timely, consistent approvals.

DATA ANALYSIS

Organize, filter, import and export data, and integrate with 3rd party applications.

NOTIFICATION CENTRE

Timely system and manual notifications by email, Whatsapp, and mobile app.

WORK FOR YOU"***

DEVICES BIOMETRICS

Hardware and Software Solutions

Biometric devices, kiosks, and mobile applications provide a unified way to capture clock-ins. Employees can authenticate using fingerprints, RFID cards, or phones, reducing errors, preventing buddy punching, and ensuring attendance data flows into scheduling, payroll, and compliance reports without manual intervention.

DEVICES

Our devices use biometric technologies such as face recognition to identify personnel.

RFID

Where the use of Biometrics is restricted RFID cards are an alternative way of clocking-in.

KIOSK

Downloadable on a tablet, the Kiosk is ideal for small teams.

NFC

Tag equipment or locations with NFC tags.

MOBILE APP

An indispensable tool for remote working and geographically dispersed teams.

REDUCE ERRORS”

PAYROLL COMPLIANCE

Payroll module

Communicator Payroll centralizes salary, tax, and contribution calculations in one platform. Automated rules, integrations with timekeeping, and standard reports reduce human error and administration. Employees access payslips securely, while managers maintain accurate records supporting compliance, budgeting, and workforce planning.

ENTERPRISE

Generate payrolls for multiple companies and multiple frequencies with ease.

CAREERS

View the career progression over time; History positions, Current and even future positions.

SYNCHRONIZATION

The Time and Attendance module feeds data directly into the Payroll.

BANK TRANSFERS

Integration with major banks ensures timely and secure payments.

COMPLIANCE

FSS reporting, simplified tax compliance, automated updates of tax rates and regulations.

EVERY TIME"

PATROL MODULE

PATROL SECURITY

Patrol module

Using NFC-enabled phones, security staff scan scheduled checkpoints, instantly logging who scanned, exact time, notes, photos, missed scans, and on-time performance. Real-time reports strengthen accountability, verify patrol completion, and give managers clear evidence and insights to protect facilities and personnel.

CHECKPOINTS

Security personnel simply scan checkpoints with their mobile phones.

SCHEDULING

Assign schedules to your security team to always secure your project.

REPORTING

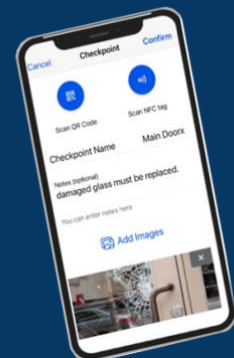

Live reporting of all sites, identify on time and late checkpoint scans.

IMAGES

Security personnel can add images to document damages or irregular activity.

NOTES

Document suspicious activity or alert the maintenance team of urgent repairs.

PROJECT MANAGEMENT

Costings module

The alignment of project management and time and attendance systems strengthens governance. Recording hours directly against activities supports budgeting, capacity allocation, and milestone tracking. Decision-makers obtain auditable data to evaluate performance, manage deadlines, and implement corrective actions that sustain efficiency.

WORKCODES

Assign billable hours of individual team members to specific projects.

TASKS

Assign job cards to team members and include details such as materials and location.

SUPPLIERS

Request, Reconcile and Pay purchase orders.

CLIENTS

Show your client a detailed breakdown of the billed hours, issue invoice, apply different rates.

ANAYLSIS

Quick overview of project progress, flag tasks as complete, monitor employee productivity.
